Frequently Asked Questions

Find out everything you need to know about using Veero products.

What makes Veero different from other data or proxy providers?

Veero combines real African IP access with real African data insights – something no other platform offers in one place.

We provide:

- ✓ Trusted Nigerian residential & mobile proxies
- ✓ High-quality African market intelligence
- ✓ Real-time alerts
- ✓ Tools designed specifically for African industries

Our long-term vision is to become Africa's most reliable data + network infrastructure layer.

Search in FAQ

What is Veero Insights?

Veero Insights is an all-in-one African market intelligence platform.

It tracks market movements, competitor activity, search visibility, promotions, pricing changes, customer behavior signals, and more.

How many African countries does Veero currently support?

Nigeria only for now.

But our expansion roadmap includes: Ghana, South Africa, Kenya, Egypt, Uganda, Morocco, Tanzania, Rwanda, and much more

How many African countries does Veero currently support?

Nigeria only for now.

But our expansion roadmap includes:

Ghana, South Africa, Kenya, Egypt, Uganda, Morocco, Tanzania, Rwanda, and much more

Can I test Veero before subscribing?

Yes.

Veero Insights: Free 7-day trial

Veero Proxies: 200MB free or \$1 test option (varies by plan)

You can explore everything before paying

Do I need technical expertise to use Veero?

No.

Veero Insights is built like a simple dashboard.

Veero Proxies are plug-and-play with username/password login.

Advanced users can also connect via:

- HTTPS / SOCKS5
- Rotating gateways
- Sticky sessions
- Multiple keys

What can Veero Insights help me track?

Veero tracks everything that matters in fast-moving African markets – depending on your plan. This includes:

- Competitor launches & new entrants
- Promotions & price changes
- Visibility ranking
- Industry momentum
- Search trends
- Product updates
- Content changes
- Sales & customer demand insights (coming soon)
- Multi-country market comparisons (coming soon)

As we expand, your dashboard will automatically gain new insight types.

Who uses Veero – and for what?

Veero supports:

- African businesses (fintechs, banks, gaming, e-commerce)
 - Global companies entering Africa
 - Researchers & analysts
 - Proxy users who need African IPs
 - Automation & scraping teams
 - Marketing teams running competitor research
 - Agencies & consultants
 - Startups validating opportunities
- If you need African data, African IPs, or African competitive intelligence, Veero is built for you.

What makes Veero proxies reliable?

All Veero proxies come from real Nigerian devices — no datacenter IPs.

This gives you:

- ✓ Lower block rates
- ✓ Rotating or sticky sessions
- ✓ Unlimited endpoints
- ✓ Dedicated reseller keys on larger plans
- ✓ African-specific routing optimised for research, scraping, and automation

As we expand, you'll also get Ghanaian, Kenyan, South African, Egyptian, and Moroccan IP pools.
